Market Overview: Consumer loans

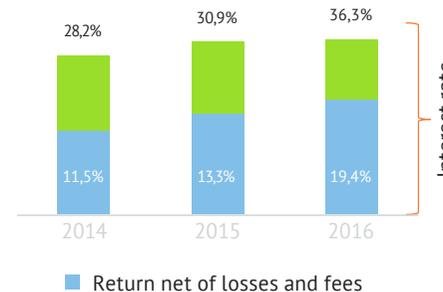

- The markets Bondora operates in are attractive for consumer lending due to limited availability of credit through the banks, caused by technological and regulatory barriers
- Consumer credit market has contracted considerably from their peak witnessed in 2008 in Spain and Estonia, but has grown in Finland
- Finland, Estonia and Spain are highly digitalised markets, with Spain offering most significant upside in digital convergence
- In line with advancements in technology, the markets have attracted alternative lenders offering consumer credit online
- Competitive advantage of Bondora stems from provision of loans with clear product utility, attractive interest rates and seamless customer experience
- Targeted near-prime segment enables to cover widest market and win over customers both from banks and payday lenders
- Risk-adjusted interest rates, controlled defaults and strong performance in recoveries ensure high returns

Bondora targets segments that banks have difficulties reaching due to technological and regulatory barriers

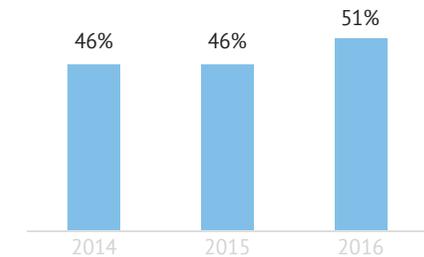

Advanced underwriting enables to offer better terms than the payday lenders

Interest rates and net returns

Cash flow restored (% of planned principal)

Bondora focuses on near-prime segment overlooked by banks where it has a competitive edge

History of Bondora

Bondora has been adapting its business so it can offer credit products in selected markets

Competitive Advantages

Experience in serving lower and middle income customers

- Bondora's focus on creating cost-effective ways to serve lower and middle-income customers and payday loan customers has enabled it to deliver strong risk-adjusted net returns on its loan portfolio while keeping customer acquisition costs under control

Proprietary underwriting, collection and recovery processes

- Bondora conducts thorough background checks on prospective borrowers, including verifying their income and expenses
- Bondora's approach facilitates a faster and cheaper assessment of credit and fraud risks, enabling it to offer the most appropriate loan products to its customers
- Its servicing practices afford Bondora complete control over accounts and help ensure that loans are repaid in a timely manner

International business architecture

- Bondora combines unique and best-in-class skills derived from its experience in and the resources available across multiple countries
- Bondora leverages Swedish banking infrastructure, German technology management, Estonian application development skills, cost-effective FinTech back-office operations and American marketing know-how

Single platform for borrowers across Europe

- Bondora has developed a single technical platform that can be used in any number of jurisdictions, regardless of borrowers' residency, language and currency
- Bondora's proprietary technology allows extensive economies of scale; functional improvements, as well as costs are shared across the markets it operates in

Advantageous base of operations

- Bondora's legal entity is based in Estonia, which has a strong sovereign credit rating and a favorable tax environment
- Bondora has access to a qualified IT work force with experience working at leading technology companies (e.g. Skype, Grabcad and Transferwise)

Bondora leverages its strengths and the assets it has developed over the past seven years to capitalize on a unique opportunity

Sourcing and Volume Generation

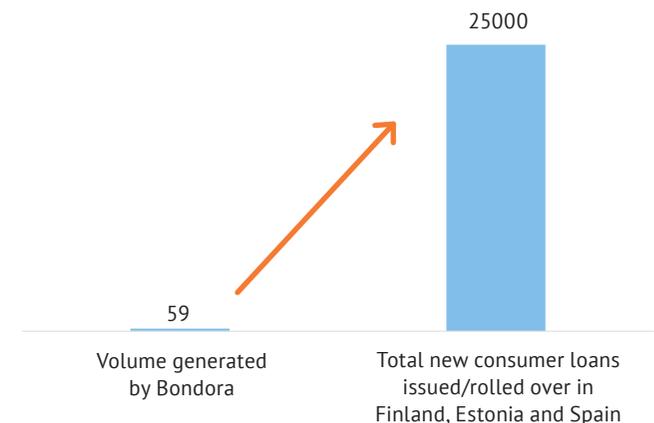

- Finland, Estonia and Spain are sizable and highly digitalised markets well adapted to online lending
- Loans offered by Bondora have clear product utility in relation to competition, as longer durations enable customers to take bigger loans with lower monthly instalment
- Total market of consumer credit in Finland, Estonia and Spain is close to EUR 76 billion and annual estimated turnover is EUR 25 billion, with only a fraction of the market been tapped by Bondora
- Bondora markets itself to borrowers using a combination of search engine marketing and television advertising
- Bondora initiates also email campaigns targeted at existing, previous and prospective customers
- Bondora has been operating in Estonia over 7 years, on the Finnish and Spanish market for 3 years and it has developed an efficient customer targeting model
- In 2016 the volume of investable loans generated in Finland, Estonia, Spain reached EUR 59 m
- Bondora has on multiple times tested that the volume can be more than tripled without changing the risk profile with additional investments directed at TV and online advertising

Bondora has developed efficient marketing model to address high volume of potential customers

Split of marketing channels in 2015

Market potential of investable loans (EUR m)

Underwriting Process

Underwriting is managed by a team of highly experienced and skilled professionals

- The Credit team has extensive experience in developing credit models.
- Credit risk-related activities are supported by data engineers, including one who has a PhD in economics, and a PhD candidate in machine learning/computer science.

* Bondora Ratings range from AA (the safest grade) to F (the riskiest "investment grade" rating). Additionally, Bondora assigns a grade of "HR" (high risk) to loan applications with an expected loss of 25% or higher.

Risk Scoring

Data collection
and analysis

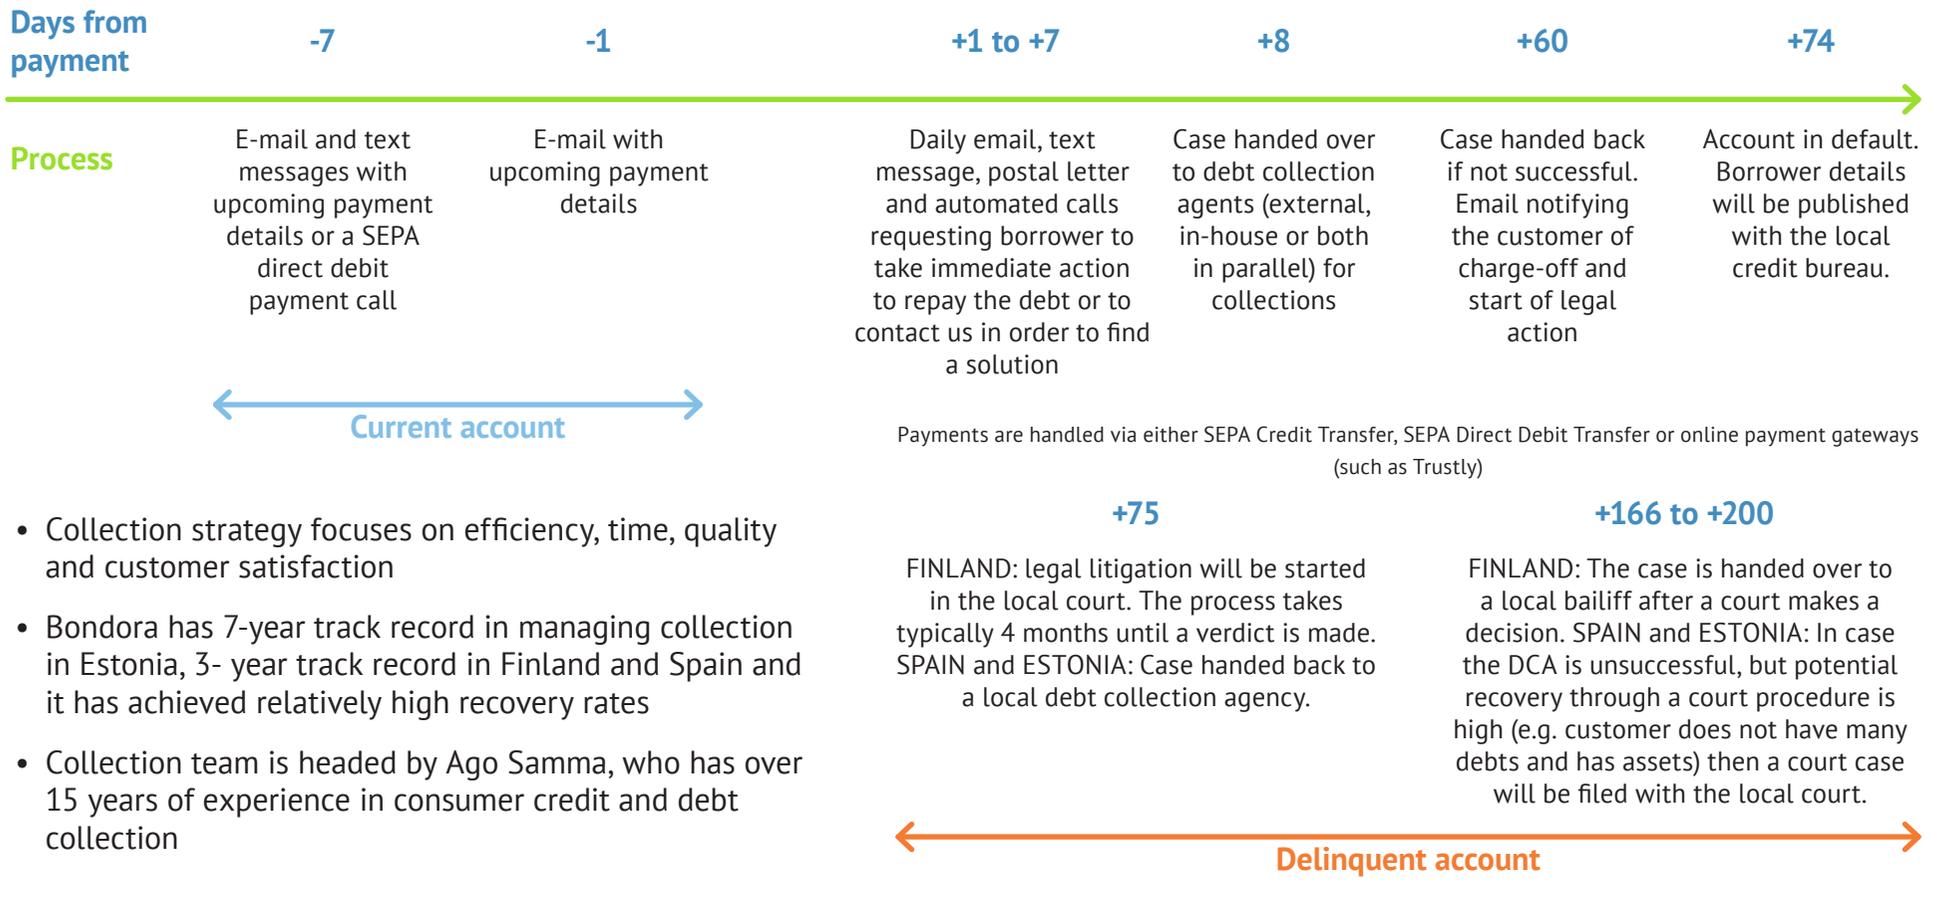

Proprietary
scorecards

- Since launch of the operations, Bondora has analyzed loan applications with value of over EUR 1,6 billion of and has developed significant experience in credit scoring using the data it has amassed
- Bondora has developed high level of expertise in Finland, Estonia and Spain with its proprietary credit scoring database that provides insight into customer behavior
- Bondora uses an internally developed credit scoring model to calculate a prospective customer's risk rating
- The risk rating is calculated using all of the data collected
- The exact variables that affect customer's credit risk rating are established and adapted as needed through statistical analyses
- These variables may include income information, employment records and credit history as well as marketing and other non-traditional data
- Bondora scorecards are prepared by its consumer credit business unit 's scoring and pricing team
- The scorecards are regularly evaluated and calibrated

Bondora has developed high level of expertise in its markets with its proprietary credit scoring

Recovery Process

- Collection strategy focuses on efficiency, time, quality and customer satisfaction
- Bondora has 7-year track record in managing collection in Estonia, 3- year track record in Finland and Spain and it has achieved relatively high recovery rates
- Collection team is headed by Ago Samma, who has over 15 years of experience in consumer credit and debt collection

+75

FINLAND: legal litigation will be started in the local court. The process takes typically 4 months until a verdict is made.
 SPAIN and ESTONIA: Case handed back to a local debt collection agency.

+166 to +200

FINLAND: The case is handed over to a local bailiff after a court makes a decision. SPAIN and ESTONIA: In case the DCA is unsuccessful, but potential recovery through a court procedure is high (e.g. customer does not have many debts and has assets) then a court case will be filed with the local court.

Success factors

- Early initiation through reminding customers on payments in advance and fast start of collection process on delinquent accounts
- Good cooperation with local courts and debt collection agencies
- Fast and efficient execution of court cases filed through API or local partners

Through efficient process Bondora has achieved relatively high recovery rates

Traceability and Policy Rules

Identification and traceability of customers

- In Finland, Estonia and Spain customers can be traced based on their ID number
- All the borrowers are identified by their phone number, address and bank account data, whereby identity and ID number are linked to the application
- Strong traceability enables to identify potential fraud and ensures that debts can be collected

In Finland, Estonia and Spain traceability is very high due to the linkage between individual's national ID number and almost all the aspects of public life

Address change

Job change

Public support

Healthcare

Tax, police and legal system

Bank, insurance and payments

Subscription to services

USE OF NATIONAL ID NUMBER

Loans are issued one the basis of stringent Policy Rules of Bondora

Key terms of the Policy Rules
